Notes for Project Inventory

- 1. **Project Year -** Based on a calendar year. Current project year is same year as current Fair.
- 2. Date Acquired List the date you obtained this item, on items older than 1 year, the year will be sufficient.
- 3. Purchase cost or value What did this item cost when you obtained it? (Fair market value)
- 4. **Value at Beginning of Project** Same as purchase cost for items purchased current calendar year. On items from previous years this should be the value from last year's ending inventory or depreciated value of 10% of purchase cost per calendar year.
- 5. **Depreciation of 10%** This will be 10%, per calendar year, of the original purchase cost for the items you will still have at the end of the project.
