Project Terms and Explanations

Notes for Project Inventory

1. **Project Year** - Based on a calendar year. Current project year is same year as current Fair.
2. **Date Acquired** - List the date you obtained this item, on items older than 1 year, the year will be sufficient.
3. **Purchase cost or value** - What did this item cost when you obtained it? (Fair market value)
4. **Value at Beginning of Project** - Same as purchase cost for items purchased current calendar year. On items from previous years this should be the value from last year's ending inventory or depreciated value of 10% of purchase cost per calendar year.
5. **Depreciation of 10%** - This will be 10%, per calendar year, of the original purchase cost for the items you will still have at the end of the project. This includes items you had at the beginning of the project as well as items purchased during the current calendar year. Depreciation is the loss in value of your assets and is an expense.
6. **Value at the end of the project** - This is the value at the beginning of the project minus the depreciation.

Examples:

Items Description	Date Acquired	Purchase Cost or Value	Value at beginning of project	Depreciation (10% of purchase cost, for this calendar year)	Value at end of project
Rope	Purchased 4 years ago,	5.00	(Depreciated 10% for 3 years) 3.50	.50	3.00
